### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Gzybowski on March 24, 2006.

The application has been amended as follows:

In the Specification:

Page 1, after the title, the following has been inserted as a separate paragraph:

--This application is a non-provisional application of U.S. provisional application number 60/445,490 filed on February 6, 2003 --.

In the Claims:

Claim 1, between lines 7 and 8, the following has been inserted as a separate paragraph:

--an axially extending conduit--.

Claim 1, line 14: --first-- has been inserted before "and second inserts".

Claim 7, line 1: "5" has been deleted.

### DRAWINGS

The proposed drawing amendments are approved. New corrected drawings in compliance with 37 CFR 1.121(d) are required. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Applicant's statement at page 8 of the Remarks, that upon review and approval of the drawing amendments, applicant will submit formal substitute drawings is noted

### COMMENTS

At page 9 of the Remarks, applicant states that the limitations of claim 10 have been incorporated into independent claim 1. The change to claim 1 above has been made to insert a missing word from claim 10. Claim 6, line 1 and claim 11, lines 2-3 recite "an axially extending conduit". This expression lacks antecedent basis in claim 1 from which both claims 6 and 11 depend. Claim 1 has been amended to insert this expression and provide the needed antecedent basis. Claim 7 as presented by applicant in the amendment of January 17, 2006, recited "The device of claim 6 5 --. As written, the dependency of claim 7 was not clear. Claim 7 has been amended to depend on claim 6. The specification has been amended to include a reference to provisional application 60/445,490.
